

ConneXt Pack is part of Honeywell ConneXt Safety Solutions, the most intelligent gas detection systems in the world.

The new Honeywell ConneXt Safety Solutions combine proactive safety and risk reduction with real-time connectivity. ConneXt solutions deliver 24/7 remote atmospheric monitoring, GPS-based man-down tracking and delivery of real-time data to a central location for improved emergency response, and increased productivity.

Now you have the power to bring real-time gas detection to any project with a full range of solutions:

ConneXt Pack, the industry's first and only turn-key wireless monitoring system for routine maintenance confined space entry.

ConneXt Plus, a real-time, easily deployable wireless safety system that can be used for plant turnaround, overhaul, incident response and mobile wireless gas detection.

ConneXt Pro, a full enterprise solution that delivers the highest level of real-time intelligence in the harshest work environments. ConneXt Pro is the solution that provides you with year-round 24/7 coverage. Once installed, ConneXt Pro can be easily duplicated across many plants.

ConneXt is always on, always ready. With ConneXt, you know exactly what's happening—the second it happens. **It's time to ConneXt.**

When every second counts, count on ConneXt Pack.

Protect workers in confined spaces with our rapidly deployable, application-focused wireless gas detection system.

CONNEXT PACK

**Know now.
Act now.**

**Be prepared.
Stay prepared.**

4 Minutes: That's all the time you have to rescue an unconscious worker in a confined space.

Give your team the real-time connectivity they need, wherever they need it

Your team works in a lot of different hazardous environments—and you want the same high level of toxic gas detection everywhere they go. Honeywell ConneXt Pack is the first and only turn-key, wireless detection solution that can provide real-time, man down alarms and alert you to atmospheric contaminants.

Put the power of ConneXt Pack to work for you:

- › Easy-to-use, rapidly deployable, turn-key packs
- › Real-time alerts for faster response time and automatic data logging for compliance
- › Ideal as entry-level solutions for routine maintenance or compliance monitoring
- › Real-time display of gas concentration and alarms from up to eight wireless gas detectors with an EchoView Host portable controller

ConneXt Pack — ready to work, ready to detect

This is the perfect turn-key safety solution for:

- › Confined space entry
- › Utility/telecommunications tunnels

Now is the time to upgrade to wireless safety

When it comes to detecting hazardous gas, you simply cannot afford to settle for the status quo. ConneXt Pack brings you real-time information in a way that's so immediate and precise, it's setting the new standard in safety, productivity and compliance. Now you can stay a step ahead in man down situations. When you know that an atmospheric alarm condition is fast approaching, you'll be able to alert your workers earlier, evacuate the confined space sooner and save more lives.

ConneXt Pack is adaptable to your constantly changing job sites. It's also extremely easy to scale up into more advanced wireless systems when needed.

Your Honeywell team can help build a ConneXt Pack kit with MultiRAE, QRAE 3, ToxiRAE Pro monitors and an EchoView Host to meet your unique safety requirements. Call us today to get started.

ConneXt Pack Kit
Sets up in seconds. Detects threats immediately.

Stay connected on every level. Stay prepared for everything.
